LATENCETECH NOW AVAILABLE ON SIXSQ'S NUVLA MARKETPLACE

The Nuvla platform will allow LatenceTech to quickly and easily market and deploy its technology to its target customers

Geneva (Switzerland), Montréal (Québec), January 12, 2023 — LatenceTech is pleased to announce that its technology will now be offered on the Nuvla platform, operated by SixSq, an Ekinops company. This agreement will allow LatenceTech to quickly and easily market and deploy its technology to service providers and network operators.

Using artificial intelligence, LatenceTech offers a solution for real-time analysis and prediction of 5G network quality, with a focus on ultra-low latency connectivity.

SixSq's Nuvla is a proven B2B digital platform for industrialization and automation of containerized edge applications and device management. The Nuvla app vendor program gives app vendors and customers tools to interact in a seamless way, including clear pricing and contractual terms. It also provides hassle-free monetization of business applications for telcos, service providers and system integrators.

With the Nuvla platform, LatenceTech's technology will be able to be marketed and deployed, through a simple and robust purchasing process. Buyers will be able to use LatenceTech's solution with just a few clicks using the user-friendly dashboard developed by Nuvla.

"Our agreement with SixSq is an important milestone for LatenceTech as it allows our company to market our technology on a large scale on an efficient and well-established platform to our target audiences. We believe that the Nuvla platform is an excellent fit for our technology and business model. We are confident that this partnership between SixSq and LatenceTech will be mutually beneficial, and that it will allow our future customers to benefit from the high value-added advantages of our technology in a simple and quick manner," said Benoit Gendron, President and CEO of LatenceTech.

"This partnership with LatenceTech fills an important gap in the ability for service providers to monetize 5G. Now users can accurately and easily measure SLA compliance, something that is paramount when selling high quality services, without taking risks. And all this is a few clicks away using Nuvla", said Marc-Elia Bégin, SixSq CEO and Co-founder.

The service is available via a pay-as-you-go subscription. You will find LatenceTech on the Nuvla Marketplace [here](#).

About SixSq

SixSq is a leader in edge computing B2B platform as a service. The team is based in Geneva, Switzerland, and embraces the Swiss ideals of excellence, innovation and precision. Nuvla.io, the company's edge-to-cloud B2B management platform and marketplace, allows customers to deploy a secure and comprehensive edge and cloud strategy, while avoiding lock-in. The NuvlaEdge software turns any x86 or ARM hardware platform into a smart edge device connected to Nuvla.io to deploy applications in a range of sectors. The result is a secure edge-to-cloud solution that is application centric, hardware agnostic, cloud neutral and container native.

SixSq is part of the Ekinops Group, a leading network equipment and solutions provider. For more information, please visit sixsq.com and ekinops.com.

About LatenceTech

LatenceTech offers a real-time cloud analytics and monetization solution for wireless networks with a special focus on ultra-low latency connectivity in support of time-sensitive innovations. Founded by seasoned telecom and IT executives, Benoit Gendron, Nicolas Gorse and Emmanuel Audousset after seeing how sustained low-latency connectivity a positive game-changer for the industry's new innovative services can be. LatenceTech's mission is to help ensure the best low latency 5G connectivity for the industry. For more information or to sign up for a free trial, see www.latencetech.com/fr
